

Pranit Pawar

ABOUT ME

Full Stack Developer

Since 2016

Experimented with web application development since first year of my college. Got into the world of front end frameworks mainly **Angular** and **Vue**. Started learning **Node.js** and back end libraries for API development. Worked with **SQL**, **NoSQL** and Graph databses. Now, I am getting the taste of **web components**, **svelte** and **gRPC**.

EXPERIENCE

Cognizant Technology Solutions

Jan 2019 – Present | Application Security Developer

- ☑ Developed features for an application used for securing data.
- ☑ Implemented microservices architecture and decoupled elements for cloud deployment.
- ☑ Containerization and deployment of the application.
- ☑ Developed Front-End using Angular and Back-End using Spring Boot.
- ☑ Implemented caching and various optimizations for Database and IO bound operations.
- ☑ Developed automation scripts for variety of tasks.

EDUCATION

NIIT University

2015 – 2019 | Bachelor's Degree In Computer Science

PROJECTS

Event Management System

2018 | MEAN Stack

Developed event management system using Node.js (Express.js) for api development and Angular for frontend. Used mongoDB as the database along with mongoose to create object models. Secured our api using JWT and experimented with Auth0 for OAuth identity management.

Image Steganography

2018 | HTML/CSS/Javascript

Developed an application to hide encrypted data in images. Used Stanford Javascript Crypto Library & HTML5 canvas to get image data and altering pixel data to store messages inside them.

SKILLS

JavaScript

Middle Level

Stongly familiar in pure functions, higher-order functions, factory functions, composition, closures and the event loop.

ES6 Functional Programming

Reactive Programming

Python

Advanced Level

Excellent grasp with the python data model, special functions, coroutines, concurrency and metaprogramming.

Django Asyncio Functional Programming

API Development

Medium Level

Good understanding and experience with the python data model, special functions, coroutines, concurrency and metaprogramming.

Django Rest Framework Fastify/Restify/Express

Node.js

Database

Medium Level

Moderate grasp of database systems including both SQL and NoSQL databases. Experience in development both using queries and ORMs .

PostgreSQL MongoDB Redis

Languages

Python JavaScript Java C++
